

Quick Action Impacts Patient Outcomes

Each minute a stroke goes untreated 1.9 million brain cells are destroyed. The American Heart Association's (AHA) goal for 'Door to Needle Time' (door to administration of IV Thrombolytics) is 45 minutes or less. We are proud to highlight Stephanie Wiesner, BSN, RN, who received the 2023 "I Saved a Brain" award for reporting the fastest time of 12 minutes, giving stroke patients the best chance for positive outcomes.

If you want a nursing career where nurses are valued and supported, consider UAMS Nursing.
